

Remedy Furniture & Design Center

Full-service firm and resource center knows style

It has been a big year for the team at Remedy Furniture & Design Center! From taking on several large-scale projects to opening a brand new retail location, the team of talented designers at Remedy welcomes everything from new construction to remodels, interiors to exteriors and executing all the details in between.

The Remedy design center is a great resource for clients to see, touch and experience a variety of design options. Remedy is home to a wide range of furniture lines, fabrics and other tools

to simply bring each project to life. Backed by a knowledgeable support system of designers and the latest in design technology, Remedy is known as a place for quality and collaboration.

Remedy clients can expect that their specific style and needs will be major factors in the design process, yet the goal of the Remedy design team remains the same from project to project: to create real, comfortable spaces that not only look beautiful, but are functional in everyday family life.
